TITLE : DISPLAY PROCESSING METHOD FOR LIST PICTURE

ABSTRACT : PURPOSE: To simply and quickly display necessary list data on a screen by reading out a stored list name and displaying its corresponding list picture at the time of executing prescribed control instructing operation for a list specifying area.

CONSTITUTION: An application processing part 7 interactively executes application processing such as table preparation and table calculation. A list display processing part 8 displays a 1st name set up in a list specifying area on a set screen 2a and the list data of a list name stored in a 1st name area 10c and being displayed immediately before current processing on a list screen 2b in accordance with instructing operation from a mouse 3 or a keyboard 4. The list data are written in an all-data area 10a and transferred from the area 10a to the display area to display the data on the screen. The display data on the list screen 2b can be scrolled and the size of a picture, the size of a display part, the font of characters, the display range of data, etc., can be mutually adjusted and changed.
